

EBER Petrochemical

Company Profile 2025

Growing the legacy of a foremost
petrochemical group

A New Paradigm

Company Vision

To be the foremost regional petrochemical company for its performance, ESG, people, partnership and business sustainability.

Company Mission

To develop and produce superior, reliable, environmental friendly product and provide the best solution for our customers and society in building a national industry advancement by making the best use of available resources and embracing a core set of company values.

Gde Iswantara

CEO EBER Petrochemical

"Eber Petrochemical Group is a newly consolidated entity comprising PT Eternal Buana Chemical Industries, PT Eterindo Nusa Graha, PT Petrowidada, and PT Mega Prima Solvindo each with decades of proven expertise in Indonesia's petrochemical sector. PT Eternal Buana Chemical Industries is often regarded as the "school of resins", having nurtured industry leaders across the nation. PT Petrowidada stands as the country's sole domestic producer of Phthalic Anhydride (PA), reinforcing the group's role in critical industrial supply chains. PT Eterindo Nusa Graha adds strategic value through its integrated plasticizer production. As the new management, we are dedicated to preserving this legacy of excellence while accelerating transformation towards full Industry 4.0 readiness."

Company Overview

A Group of Four

Holding of four leading chemical manufacturers

Global Expertise

Technology from Atofina

Innovative Products

Produces SLR, Alkyd, Acrylic, Amino Resin, UPR, PA, Plasticizers.

Certified Quality

Certified Quality & Safety ISO 9001, ISO 14001, ISO 45001.

EBER Petrochemical

EBER Petrochemical, established in 2021, is a holding company comprising four leading high-performance chemical manufacturing companies in Indonesia. As the parent company of PT Eternal Buana Chemical Industries, PT Eterindo Nusa Graha, PT Petrowidada, and PT Mega Prima Solvindo, EBER Petrochemical unites key players in the chemical industry under one umbrella. With deep expertise in specialty materials and a strong in-house R&D team, EBER Petrochemical delivers advanced solutions to enhance products and processes across various sectors, including infrastructure, construction, automotive, environmental, and manufacturing industries.

Group Overview

EBER Petrochemical: A Leading Player in the Petrochemical Industry

Eternal

PWD

ENG

Mega Prima Solvindo

EBER Petrochemical is a prominent group specializing in the production and distribution of essential petrochemical products. With a strong presence in Indonesia, EBER Petrochemical operates through its subsidiaries, each focusing on key chemical components vital for industrial applications. The company is committed to innovation, sustainability, and quality, ensuring its products meet global standards.

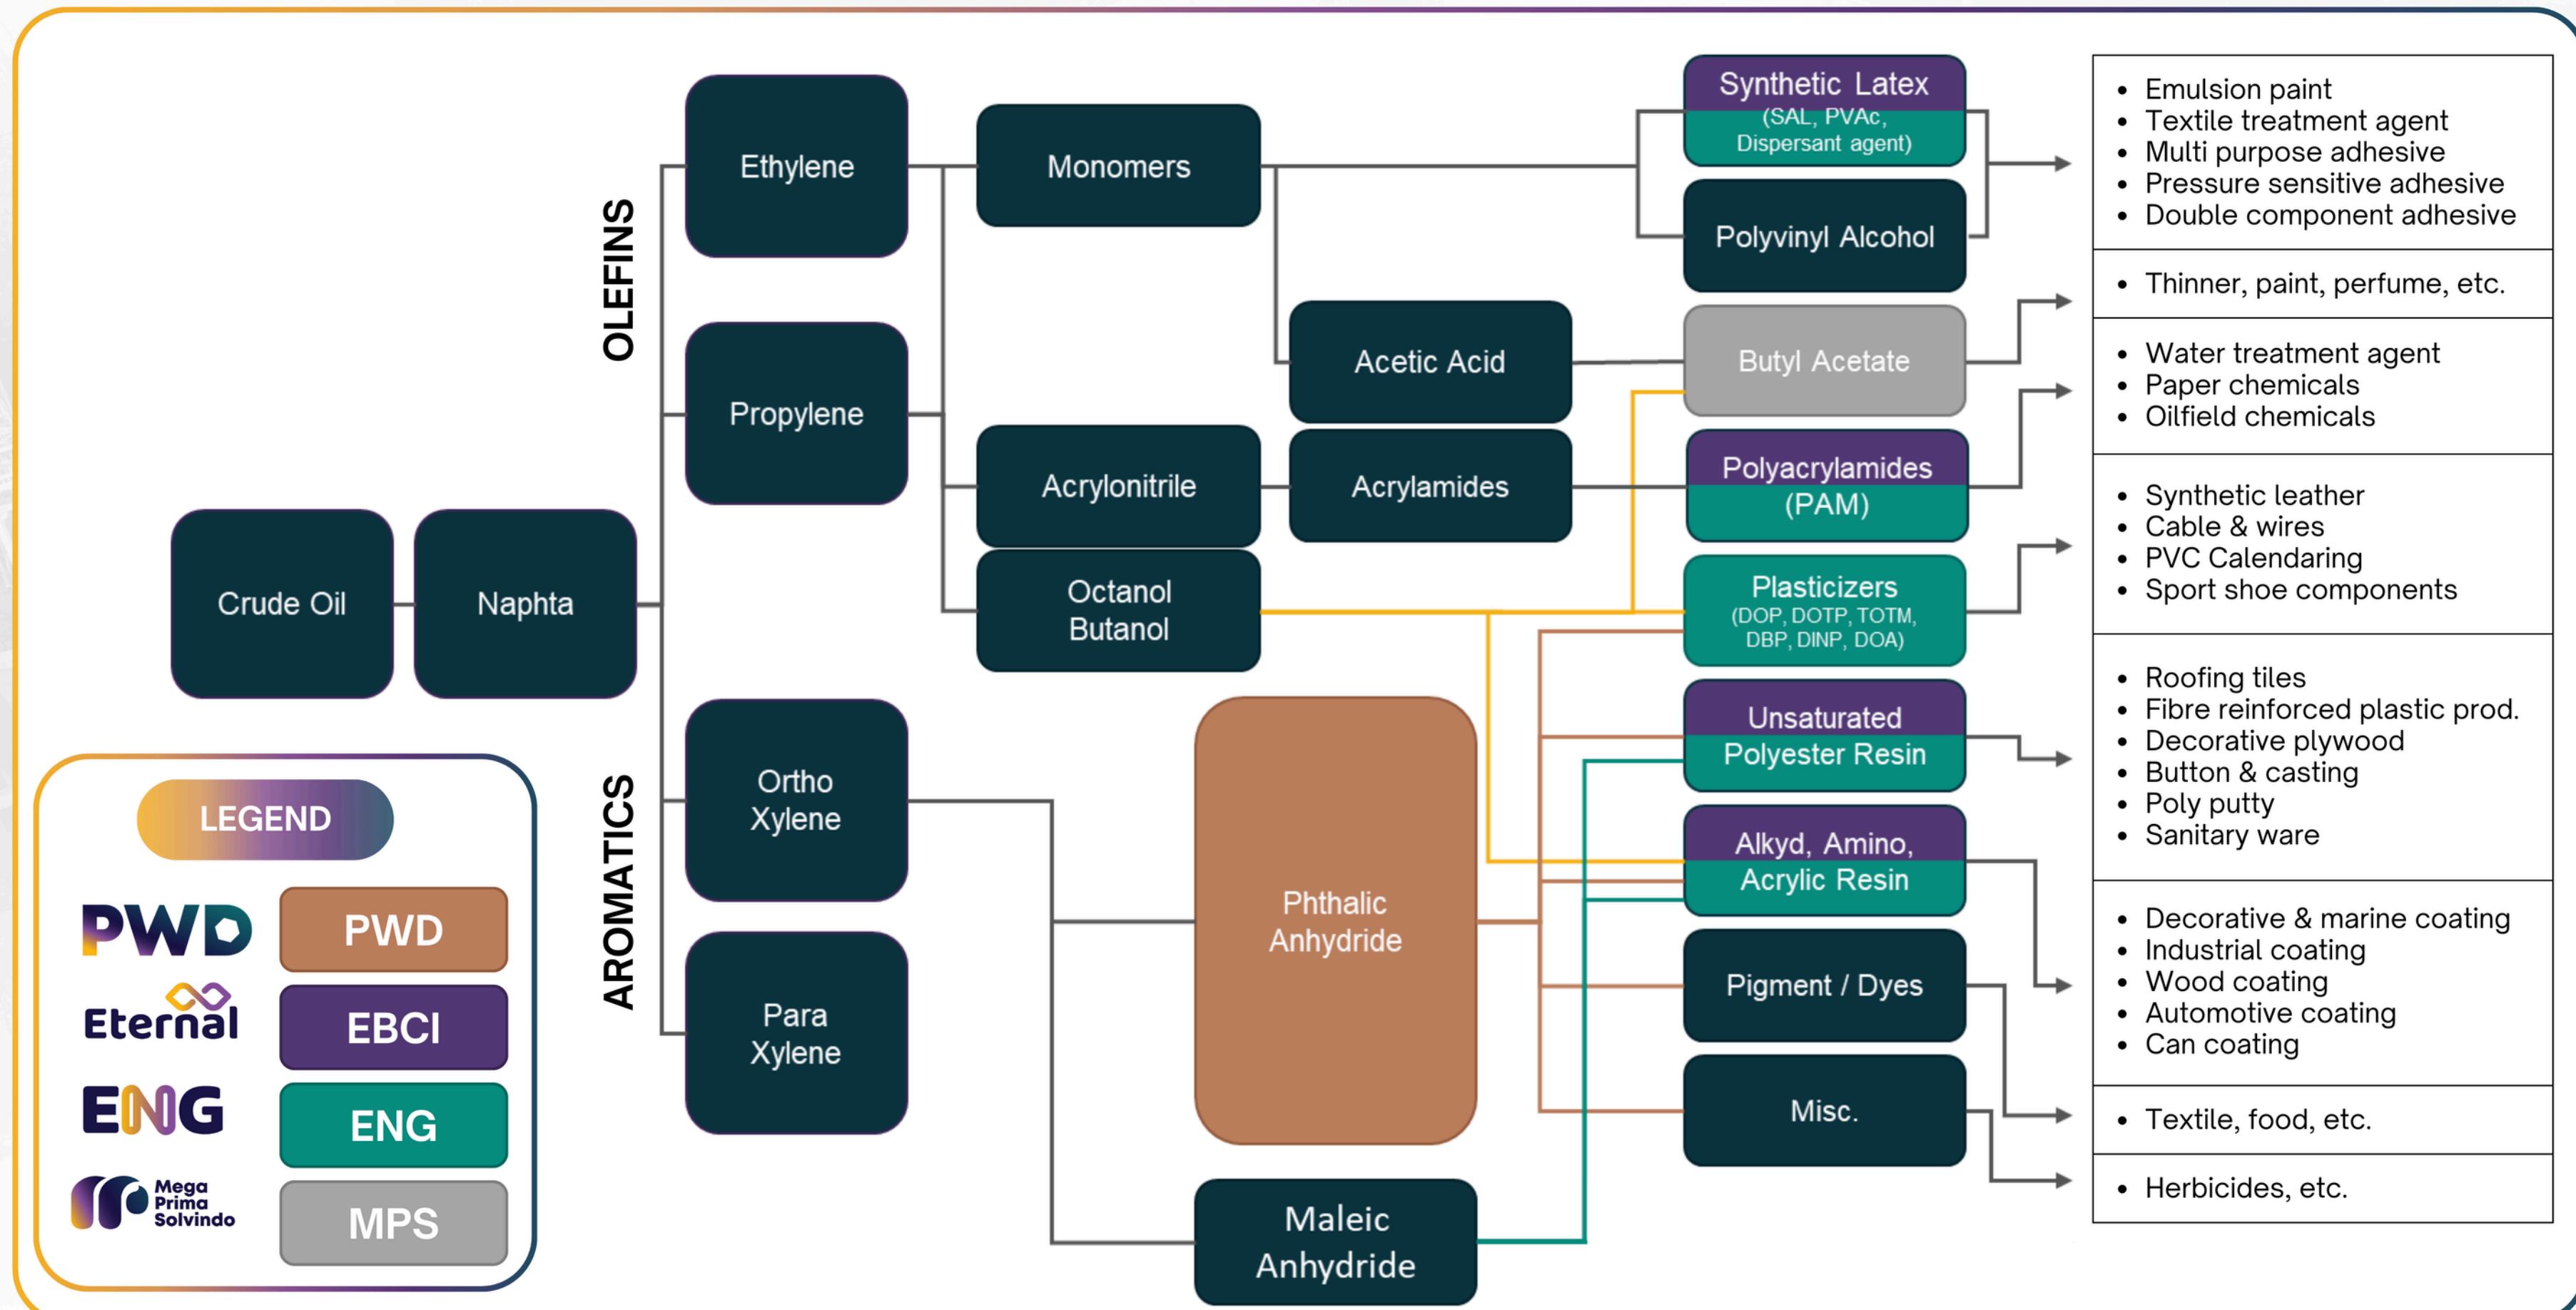

Key Subsidiaries Under EBER Petrochemical

1. PT Eternal Buana Chemical Industries (EBCI) – Cikupa, Banten
2. PT Petrowidada (PWD) – Gresik
3. PT Eterindo Nusa Graha (ENG) – Gresik
4. PT Mega Prima Solvindo (MPS) – Merak

Commitment to Excellence

EBER Petrochemical upholds international quality, environmental, and safety standards, ensuring efficient production and sustainable business practices. DIVERSE PRODUCT APPLICATIONS ACROSS INDUSTRIES

EBER Petrochemical's products play an integral role in various everyday applications. Our chemical solutions contribute to the functionality, durability, and aesthetics of items found in homes, industries, and public infrastructures. From synthetic leather and duct tape to hose components and plywood furniture, our materials help improve product quality across sectors.

Product Application

RESIN & WALL PAINT INDUSTRIAL PROTECTIVE PAINT

EBER Petrochemical's Resin & Wall Paint Industrial Protective Paint products are engineered to deliver superior performance across a wide range of applications. From protective coatings for wood, car bodies, marine vessels, and sanitary ware, to vibrant and durable finishes for buttons and plywood, our advanced resin formulations ensure long-lasting durability and excellent surface adhesion. In wall paint applications, our resins provide enhanced weather resistance, color stability, and protective sealing for both interior and exterior walls making them ideal for industrial, commercial, and residential use.

Product Application

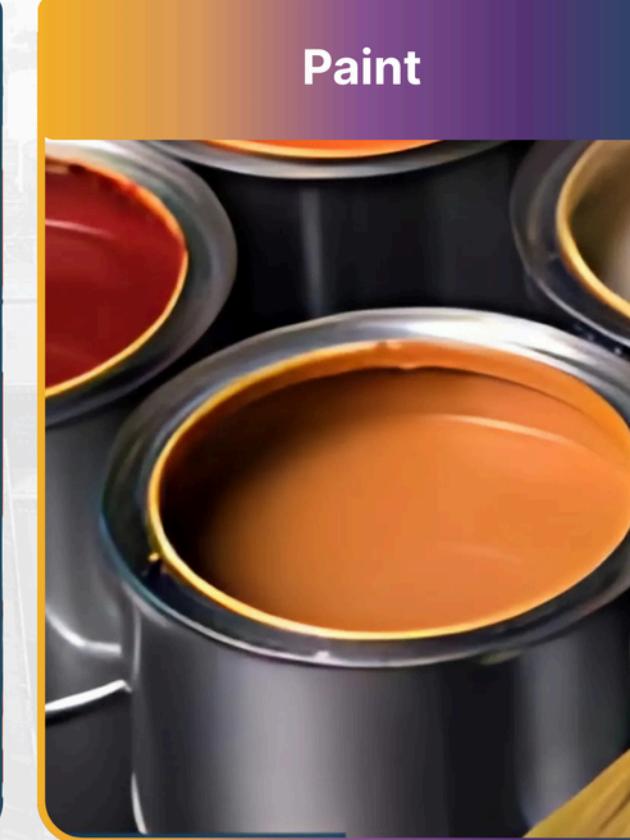

Sport Shoe Component

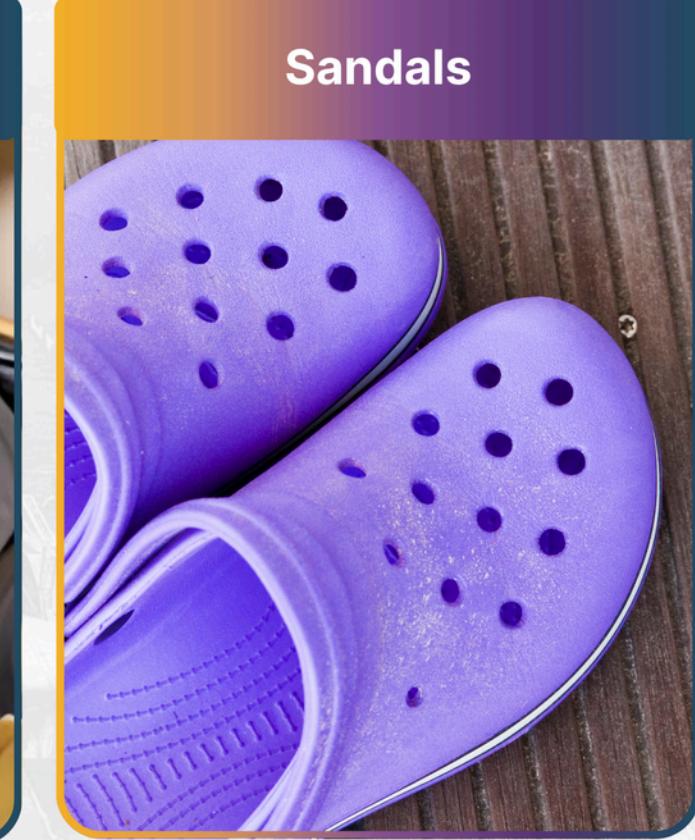

Synthetic Leather

Cabling & Hoses

Paint

Sandals

PLASTICIZERS

EBER Petrochemical's plasticizers are key additives that enhance flexibility, durability, and processability in various end products. Widely used across industries, they are found in sport shoe components, synthetic leather, cabling and hoses, paint, cleaners, industrial solvents, and the leather industry supporting performance, comfort, and reliability in both consumer and industrial applications.
